

# Instructions for Preparing and Transferring Final Papers to ICPRS 2021

## Anonymous

Do NOT include authors' names or affiliations

**Keywords:** Maximum 5 keywords placed before the abstract.

## Abstract

This is where the abstract should be placed. It should consist of one paragraph and a concise summary of the material discussed in the article below. It is preferable not to use footnotes in the abstract, the title or indeed anywhere in the paper. The acknowledgement for funding organisations etc. is placed in a separate section at the end of the text. We wish you success with the preparation of your manuscript.

## 1 Introduction

Papers for ICPRS-2021 need to be submitted for review by the **15 November 2020**. The submission should be the format described here and should be **anonymous**. If your paper is accepted, a final camera-ready non-anonymous version should be submitted, using the same electronic submission system, no later than the **29 January 2021**. Papers received after that date will not be included in the Proceedings. Your final version should be prepared taking into account the comments made by the reviewers and available to authors via the submission system. The Proceedings produced for ICPRS-2021 will contain **all** the papers accepted and **presented** in the conference.

## 2 Manuscript preparation

Full papers must be typed in English. This instruction page is an example of the format and font sizes to be used. MS Word users can download from the conference site these instructions in Word format. LaTeX is preferred as it is easier to change paper style and formatting.

These are detailed instructions valid for any word processor. In the title of the paper the initial letters should be capitalised in all words except articles and prepositions (e.g.: in, a, an, and, the, there, their, do, on, of, from, with, at etc.). E.g. "Er-Doped Si Nanocrystals as a Candidate for Optical Amplification" The type should be boldface 18pt and centred on the page. The authors' names (in the final non-anonymous version) are typed in capital and lower case bold letters and centred on the page. Directly under the authors' names in capital and lower case letters and also centred are the authors' affiliation(s), address(es), plus email address(es) of (at least) the corresponding author. Manuscripts must be typed single spaced using 10 point characters. Only Times, Times Roman, Times New Roman and Symbol fonts are accepted. The text must fall within

a frame of 18 cm x 24 cm centred on an A4 page (21 cm x 29.7 cm). Paragraphs are separated by 6 points and with no indentation. The text of the full papers is written in two columns and justified. Each column has a width of 8.8 cm and the columns are separated by a margin of 0.4 cm. The maximum length of the full paper is 6 pages (min 4 pages). **Do not number the pages and avoid the use of footnotes**. The final format in which the papers will appear on the Proceedings will be a PDF file. Authors are required to upload a **PDF** file of their final paper to be included directly in the Proceedings. **All PDF files should NOT be locked and all fonts and graphics should be embedded**.

### 2.1 Figures and tables

Figures and tables should be centred in the column, numbered consecutively throughout the text, and each should have a caption underneath it (see for example Table 1). Care should be taken that the lettering is not too small. All figures and tables should be included in the electronic versions of the full paper. We cannot guarantee that any printed version of the proceedings will use colour.

Figure 1: This is an example of a figure caption.

### 2.2 Equations

Equations should be typed within the text, centred, and should be numbered consecutively throughout the text. They should be referred to in the text as Equation (n). Their numbers should be typed in parentheses, flush right, as in the following example.

$$PA + A'P - PBR^{-1}B'P + Q = 0 \quad (1)$$

## 3 Generating a PDF file

The PDF format will be the final format under which the papers will appear in the Proceedings. Therefore you are required to submit your paper as a PDF document. If this is not possible,

Postscript format is also accepted as long as no fonts other than the recommended fonts are used.

You can use any of the popular free LaTeX editors (e.g. Kile, TexMaker, etc).

## 4 Electronic submission of the full paper

The submission process for ICPRS 2021 should be done on line at <http://www.icprs.org>

A PDF version of your final paper is required. It should be expected that after your submission, your paper is published directly from the file you send without any further proofreading. Therefore, it is advisable for the authors to print a hard copy of their final version and read it carefully.

Note that the publisher reserves the right not to publish a paper that is deemed to be poorly formatted or with poor use of English.

## 5 Your References

The list of references should be ordered in the same order as first cited in the text. All references should be cited in the text, and using square brackets such as [1] and [1, 2]. We recommend the use of IEEE Transactions style for references. *Avoid any references that could identify any of the authors, e.g. avoid "as we showed in ..."*

## Acknowledgements

The acknowledgement for funding organisations etc. should be placed in a separate section at the end of the text.

Thank you for your cooperation in complying with these instructions.
